

# How Oxford compares to other areas in England

This chart shows how Oxford compares to other local authority areas in England. It highlights among other things its unusually large population of young people, the high earnings to house price ratio and poor GCSE attainment. The chart forms part of the newly published Oxford Profile 2012 leaflet, which contains a variety of facts and figures including ‘ten things you should know about Oxford’. The profile is available online at [www.oxford.gov.uk/oxfordstats](http://www.oxford.gov.uk/oxfordstats) or by request from Mark Fransham (details below).

Domain	Note	Indicator	Oxford	Rank (of 326)	England average	England min	England range	England max
Population	1	Population growth 2001–10	13.4%	15	5.6%	–4.8%		24.5%
